

Amazon PayCode Checkout CX

Payments Experience Design
navgr@

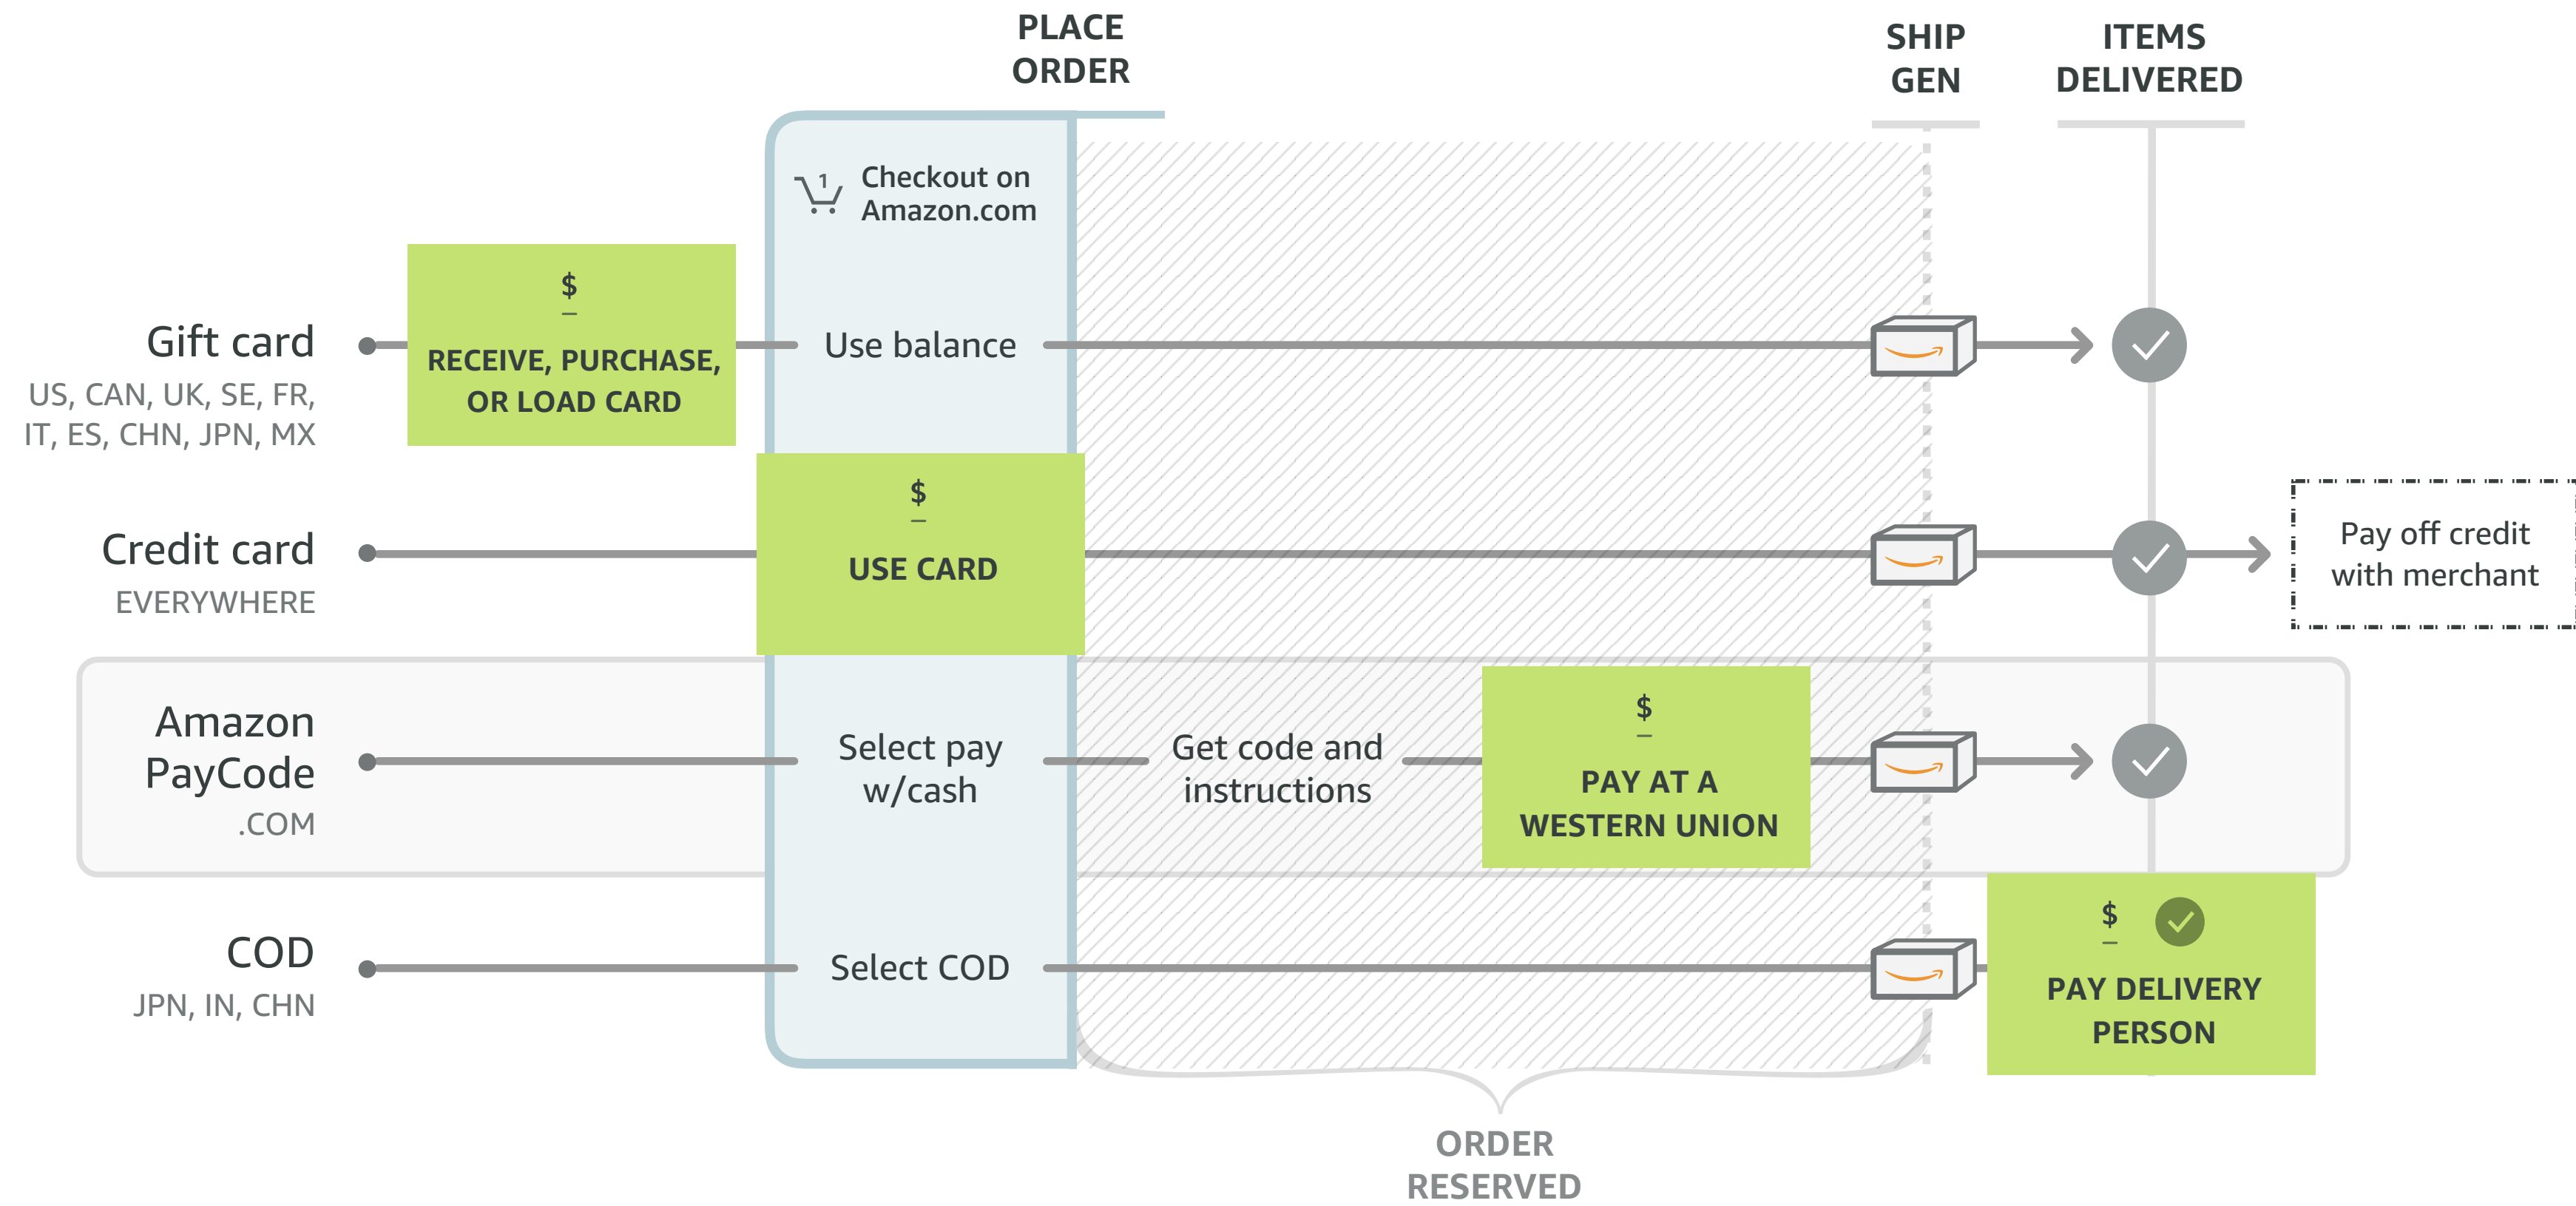

PLATFORM	Mobile, Destop
LOCALES	Global
UPDATED	March 09 , 2020

PAYCODE OVERVIEW

A cash alternative to credit/debit cards. It allows customers to pay at a designated location after placing their order.

International usability shows a significant split in understanding of this method, dependent on whether a similar method is already available for e-commerce.

COUNTRIES WITH PAYCODE-LIKE METHODS

Philippines, Japan, Malaysia, Thailand, Colombia

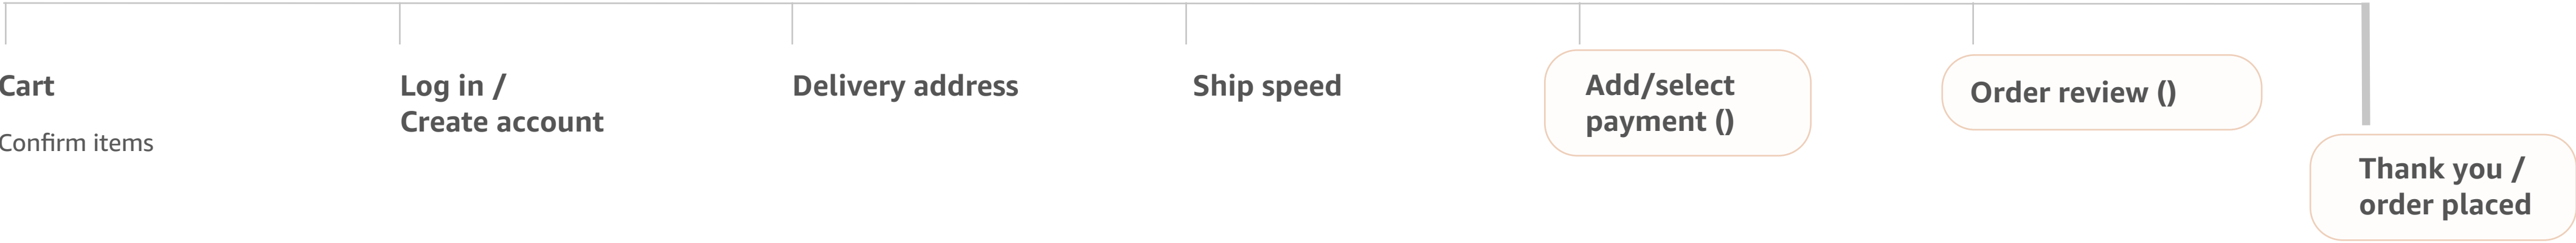

- Require less detailed instructions
- Less hand holding
- Glean details of method relatively faster
- Need specifics of where to pay sooner

NO EXPERIENCE WITH PAYCODE-LIKE METHOD

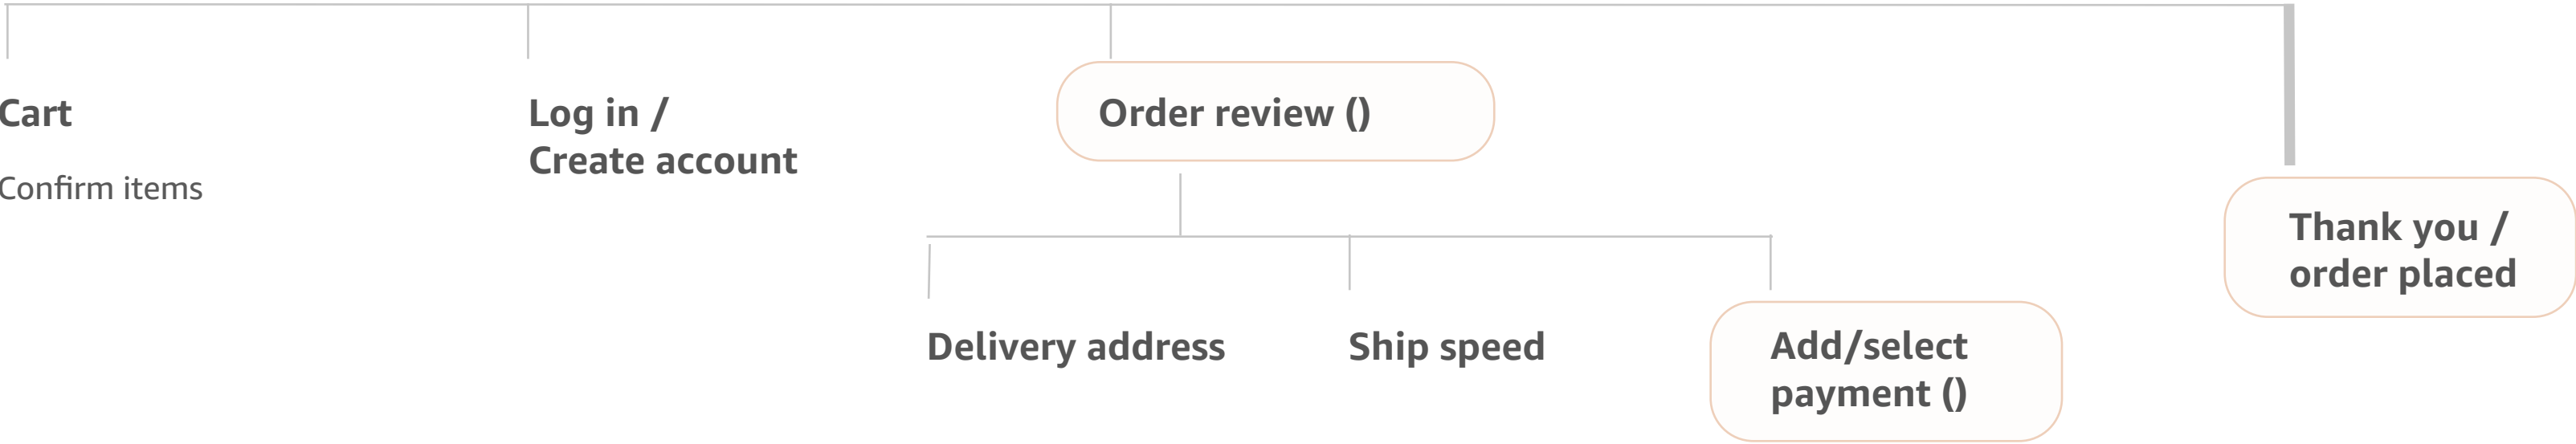

US

- Need to know about option before/during shopping
- Benefit from a slower introduction to method — usually need a spell to understand/internalize method itself before ingesting details
- Require detailed, specific instructions
- Need more hand holding/reassurances through checkout

new customer - no defaults

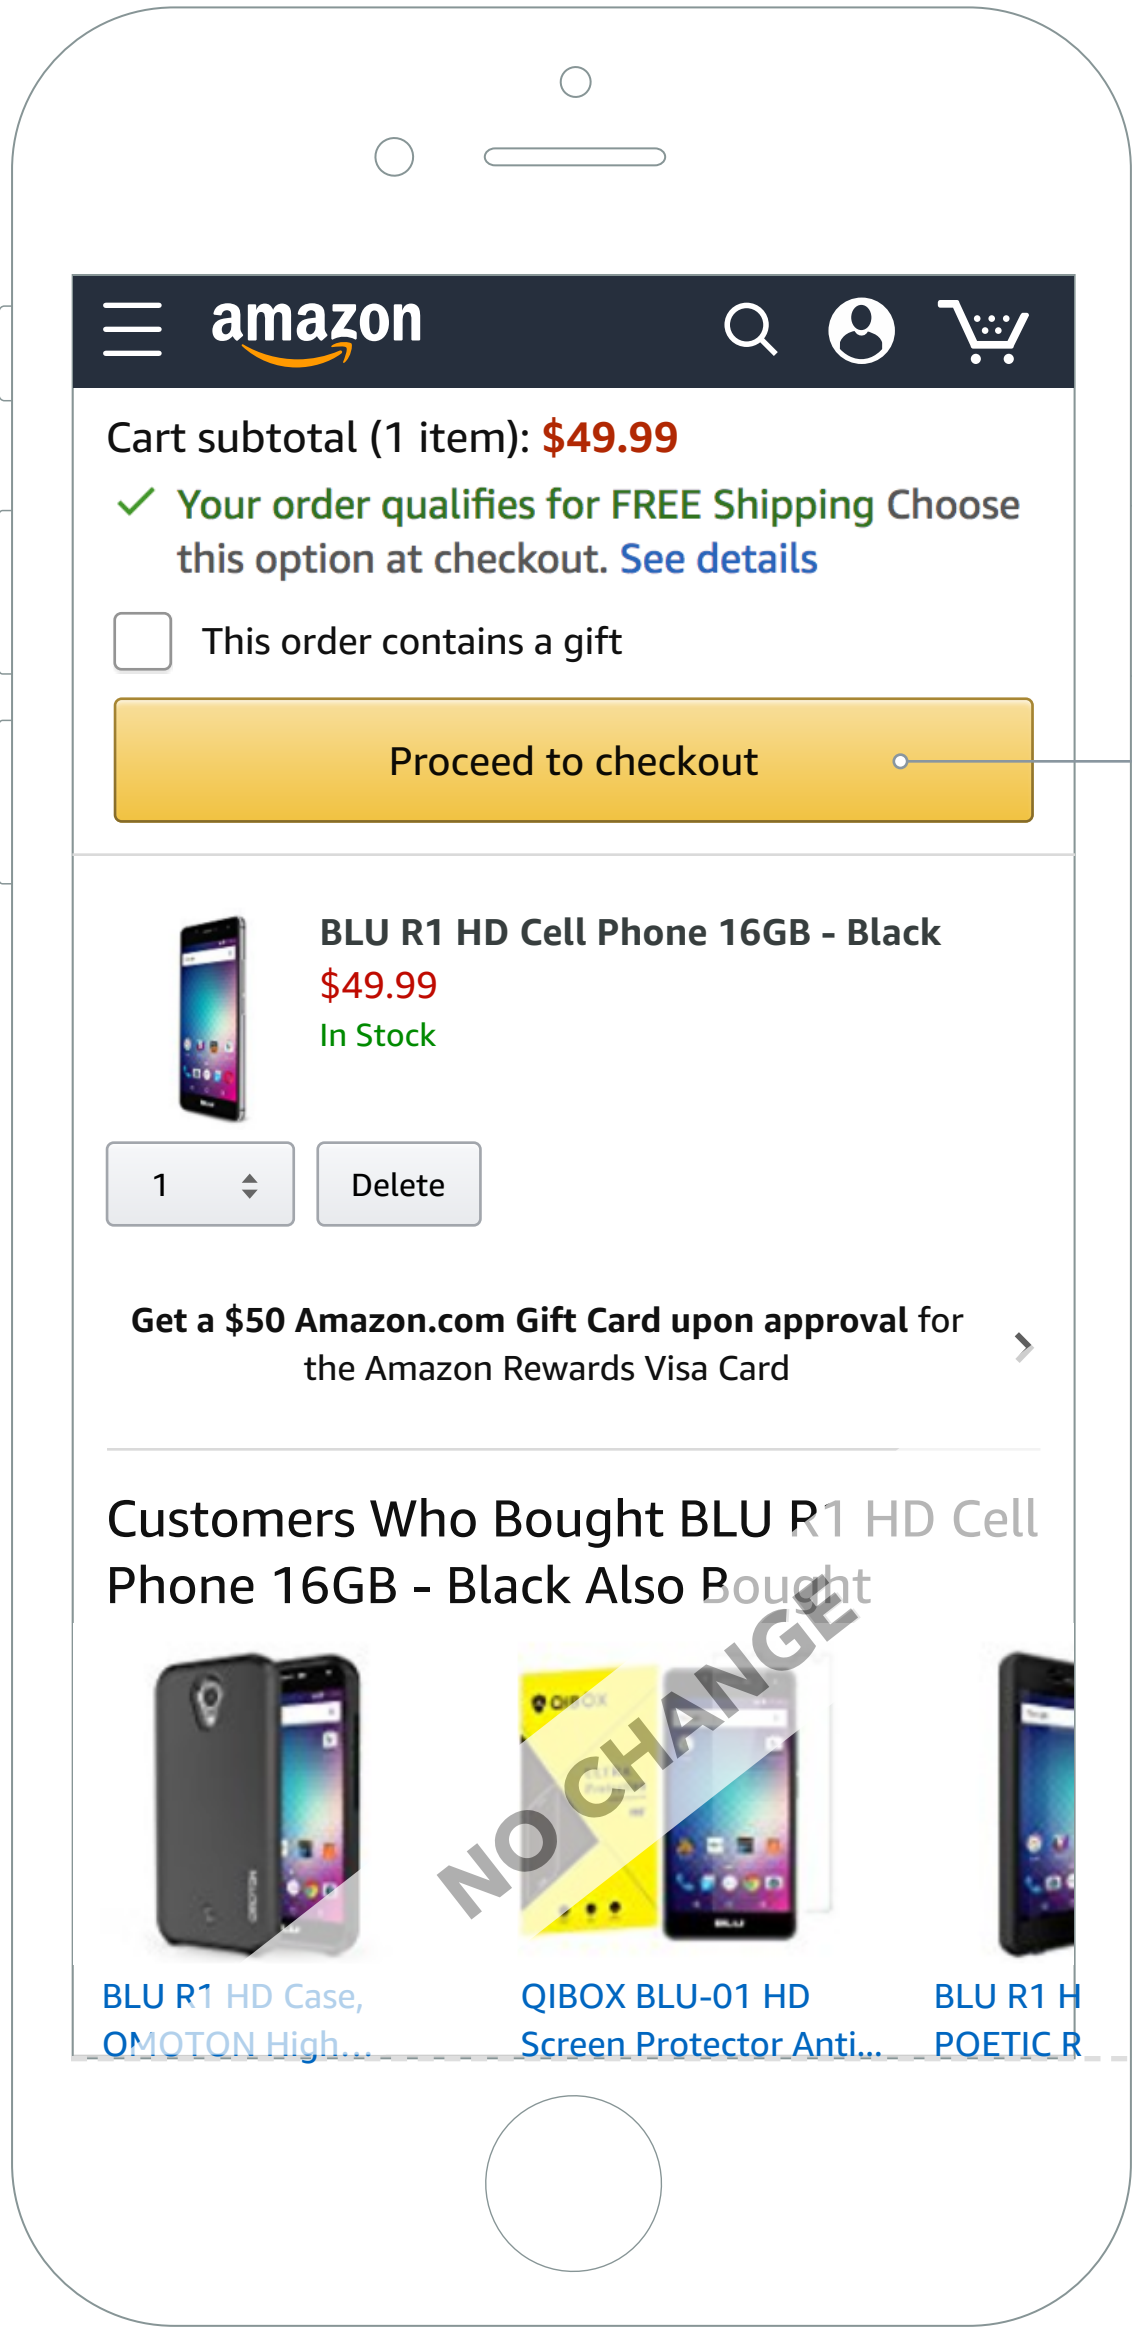

repeat customer - saved defaults
